Rev T. W. Mac Lean and Charles E. York where they will take passage on the steamer Frumessia for Glasgow, Scotland. They expect to be absent. about eight or ten weeks, and will visit many of the principal points of interest | disgracefully attacked. in Scotland and England and will also take a glance at the gay capital of France before they return.

DIED.-Mrs. Anna Gifford of Detroit, a patient at Dr. Hall's Sanitarium since last November, died here on Tuesday. Her malady was cancer, we understand, and she had been ill for five years. She was a niece of the late David Preston, and her former home was Chautauqua, N. Y, to which place her remains are removed for burial A son and daughter have ministered to her comfort here for a long time, and her last days were as comfortable as loving and skillful service could make

address by Mayor Cornwell, and a picnic and concert will fill the afternoon N. Wallace. and evening of the first day. About one hundred and fifty delegates are expected to be present. Chas. E. Brenner of Saginaw City will preside over the convention. Several of the Vereines of this county are expected to attend in a body. The Great Western Band of De- in the valuation of the second district. troit will furnish music for the occa-

to be given at the Opera House this evening, "A Soap Bubble," in which made the occasion of a complimentary benefit to Manager Curtis by his friends in the city. Mr. Curtis has been at all times obliging and accommodating in his dealings with the public as manager of the Opera House, especially has he been so with local societies of all preciation with which his kindness has been received should not be neglected. Tickets can be bought at Dodge's jewelry store until seven o'clock.

GOSPEL TEMPERANCE MEETINGS. -In his address at Good Templar Hall, last Sunday afternoon, Rev. Mr. Perrin strongly urged the immediate prosecution of temperance work in the moral suasion line, as a means of accomplishing immediate good and of further stimulating and strengthening the general anti-liquor sentiment. Rev. M.W. Fairfield followed with a few remarks, warmly endorsing Mr. Perrin's recommendation and promising his personal assistance and cooperation should any such movement be inaugurated. It is very probable that a two-week's Gospel temperance campaign will be carried on in this city, commencing about June 5, and the services of an able and successful temperance evangelist are at present being negotiated for.

Citizen," asks why we did not publish the name of a boy who was concerned in some recent store robberies, and intion, to refrain from referring to any of the many family troubles, private wrongs, social scandals, or similar matters, with which the mouth of gossip is such an offense as is contained in his Trim, McGregor & Co. have never

THURSDAY, MAY 19, 1887

They are spoken of equally as Scotch, yet the difference is not less marked, in reality, than if they were separate nations. The Highlanders still retain (or did retain when I knew them) many of the characteristics of a social state from which the Lowlanders have long since emerged. They were culloch's description of their inertia at the beginning of the century was still applicable. The people did not move, themselves, towards a better condition; they had not the spirit of improvement. They were surrounded, it is true, by natural circumstances of some difficulty, especially those caused by the severity of the climate, but they were far from making the most of such opportunities as they possessed. For example, in gardening, they did not grow, the vegetables which the climate allows, even although the want of them brought on scurvy. Their habitations were wanting in every comfort, being almost in the lowest stage of cottage-building, irregular walls of rude stone, with a small hole (glazed, however) for a window and a low thatch, the fire very commonly on the floor, and the peatreek escaping through an opening in the roof. There was no spirit of enterprise to improve the ground about the habitations, or to make communication easier when the public road (due to English military energy) did not happen to be close at hand. word, there was nothing of that fruitful discontent which leads the advancing races to incessant improvements. Without the neighborhood of the Lowland Scotch and the visits of the English, the Highlanders would certainly have remained in a very early stage of civilization. That early stage has its qualities and merits. The Highlanders have good manners. Poor or rich ship which, from the stoic and heroic of luxury that develops itself so wonderfully in the south. On the other hand, it is not the

Highlanders, but the Lowland Scotch, who have made the name of Scotland great. It is they who have made the land famous as a leader in literature, with a certain distinction in the fine arts, a considerable eminence science, and a very great and notable eminence in all industrial pursuits. The Lowlanders have written the famous books, and built the great fleets of ocean-going steamers. they who have made Edinburgh a capital of intelligence, and Glasgow a capital of industry. The Highland race had nothing but its valor and a few legendary poems; no architecture beyond the building of a few rude small castles, no arts beyond the design of a brooch or the arrangement of the crossing stripes in a plaid. Philip Gilbert Hamerton, in Atlantic.

Many valuable improvements have been lately made in the manufacture of asbestos paint in England. In the tests made of its efficiency, a piece of light pine wood, about six inches long by four inches square, painted with five coats, was placed for upward of half an hour in an ordinary grate fire, but, although the wood within was reduced to charcoal, there was charring. Again, a small model the- an act. If a man in Europe should ater, built of wood, with set scenes and accessories, was sprinkled with turpentine and set on fire; every portion ignited, and the whole was consumed. A similar model, with the set seenes and the wood framing all painted with asbestos, was drenched with turpentine and set on fire too, but the thin scenes were only partially charred at the lower ends with the turpentine flames, while the timbering was not even ignited.

Ways oi Getting a Light.

In Homer's time torches were used, even in the palaces of the wealthy. Rush lights, early in use, were rushes dipped in grease, pitch, or wax. The lanterns of the Greeks and Ro-

mans contained an oil-lamp. Its sides were made of layers of horn, waxed parchment, linen, or bladder. Glass lanterns were used in England

as early as 705. They were expensive, however, and one thousand years later the tin lantern was chiefly in use among poor people.

In the acropolis at Athens, according to a historian, was a golden lamp large enough so that when filled it would burn night and day for a year. Above it was a bronze palm tree to carry off its fumes and act as a reflector.

The Chinese excel in the manufacture of lanterns. They have used them for ages. Some of their mandarins have them built at a cost of thousands of dollars each. The word built is not out of place here, for these lanterns are twenty to thirty feet high and contain hundreds of candles. Their sides are often of rich colored

"While in West Virginia recently," said a traveling man, "I saw a lamp that was primitive enough. A saucer was filled with grease and over the edge of it hung a lighted wick. spluttered some, but made enough light to render the darkness visible, and its heat was sufficient to light the pipes of the family. It was more used for that purpose than any other, it appeared to me, though it was the only

light in the house.' Lamp comes from a Greek wordlampas. The candles of scripture are supposed to have been lamps in which olive oil was burned. The earliest lamps were shallow vessels of terra cotta, either round or oblong in shape. There was a small opening in the top in which the oil was poured; at one side was a handle and opposite a nozzle, through which the wick protruded. This form of lamp is often represented in pictures. Many of them were ornamented with representations

of war scenes or chariot-races. Improved lamps were introduced about a century ago. A Frenchman named Argand in 1784 invented a burner with two concentric tubes, the inner one, an opening for the air to pass through, and the outer one containing the wick. He had a metal chimney to make it draw and carry off the smoke. Somebody soon found out that a glass chimney was better for that purpose. Argand's lamp, variously modified and improved, is the parent of all the best modern lamps.

THE CAMP FIRE.

THE GARFIELD STATUE.

The following is a description of the statue erected by the Society of the Army of the Cumberland to General and President Garfield and unveiled The Highlanders and Lowlanders. in Washington City on the 12th of May: "It is of bronze and is heroic in size, 10 feet 6 inches in height, and stands on the pedestal looking away from the Capitol down Maryland avenue. It represents Garfield in a graceful unconventional attitude, with his top coat thrown back from his shoulder, his right hand resting upon noble rather than industrial in their a book supported by his column, and tastes and instincts, disposed for field his left holding before him a manusports more than for the improvement script as if about to address the peoof their condition by labor. Dr. Mac- ple. The pedestal is about 18 feet in height, and well proportioned to the height of the bronze figure. The granite shaft is adorned with bronze ornaments, and near the base are three brackets upon which are placed three recumbent figures representing the student, the soldier, and the statesman. These figures and the statue itself are highly praised for their artistic worth. Above these figures are tablets in the form of a shield, on which rests a globe, for the student; a trumpet and sword, for the soldier, and a laurel wreath, inclosing the scales of justice, for the statesman. Looped bands of oak leaves, alternated with acorns, in bronze, encircle the shaft. The inscriptions upon the shaft are placed upon the three sides, as follows:

Southwest face: James A. Garfield, 1831-1881. On the southeast face: Major General, U. S. V.; Member of Congress; Benator and President of the United States of America.

On the north face: Erected by his Comrades of the Society of the Army of the Cumberland, May 12, 1887. SOLDIERS' REWARDS.

For special bravery upon the battle field the French soldier receives the Cross of the Legion of Honor, the Prussian the Iron Cross, the British they are naturally gentlemen, and the Victoria Medal, and so on throughthey show a fine endurance of hard-out the armies of the world. Our own Government, however, permits no ofside, is evidently superior to the love ficial medals, except a very limited few provided by act of Congress. The Grand Army of the Republic has devised a metal button, and the Loyal Legion one of red, white and blue silk, which are worn in the upper button hole of the left lapel of the coat. The right to wear either of these badges was won on the battle field by weary marches and faithful service in the Union armies during the late war. It may be vanity, but the men who are entitled to this distinction are proud of it. I don't know that I deserve any special credit for doing my duty under fire, as well as elsewhere, but you know a fellow is naturally proud of the fact that when the rub came he had the nerve to stay there like a man. I have noticed of late a great variety of devices worn by people said to be members of various secret societies, precisely in the same manner, and to the casual observer identical with the button of the Grand Army. To the outsider doubtless these men are veterans of many battles. while to old soldiers they are people sailing under false colors, and are regarded with that contempt which naturally follows such knowledge. I am not aware of any law forbidding 'the wearing of major general's shoulder strans by any civ an but nublic blaze whatever emitted during the opinion would scarcely tolerate such

> THE BLUE, THE GRAY, AND THE BLACK. Charles Porter was police sergeant at Fort Delaware, and for his sly ways in catching up with the boys was called "Old Fox". When the news of Lee's surrender reached the fort great was the rejoicing among the federals. Old Fox came in to tell the news and sell the newspapers containing the account. "Now," said he, "poys" (Fox with any besides myself, and even to was a Dutchman), "you vill all soon go home, an ve'll all pe frents. You'll pe goot as we is. Ve'll pe goot as you is, an py tam de nigger vill pe as goot as bote of us."-Atlanta Constitution.

The old bark mill used by Gen. Grant's father when he was a tanner arrived here yesterday over the C. G. & P. Narrow Gauge on its way to Capt. R. Burke of the Iron bark mills of La Crosse, Wis. It was in two pieces, resembling big soap kettles, and was used to grind up the long pieces into tan bark. Long ago such primitive implements went out of style.—Cincinnati Enquirer.

The Department of Iowa, G. A. R. annual encampment was held at Dubuque, April 19, 20, and 21. W. A. McHenry, Department Commander, presiding. Fully three thousand veterans attended. The city was beautifully decorated with flags, bunting, banners, etc. A Knight of Labor banner read: "Welcome emancipators of slave labor; no red flag in ours." The welcome extended to the veterans was generous in every respect. General Tuttle was elected Commander for the ensuing year, and Cedar Rapids was selected as the place for holding the next encampment. Commanderin-chief Fairchilds attended and made one of his earnest speeches on the objects and work of the order. Senator Allison, Congressmen Hepburn and Henderson, and many other distinguished men were also in attendance. The members of the encampment were royally entertained by the resident posts, comrades, and friends of the veteran Union soldiers.

THE HEART OF MAX.

A marvelous loom is the human hears As it weaves and weaves through sunny It takes the flower by the mountain

stream, The tint of dawn and the globe of dew, The forest-leaf and the moonlight gleam, And it weaves a web of roseate hue: And man looks down at the fabric's sheen And says, O the world is fair, I ween--To live is joy for me.

A marvelous loom is the human heart As it weaves and weaves through dreary

days; It takes the branch of a withered tree And the pallid gray of the shimmer-

ing rain, The thunder-pall and the frozen lea, And weaves a web with many a stain: And man looks down with a cry of des-And says, O the world is a round of care-

marvelous loom is the human heart As it weaves and weaves, though under the mold:

To live is a sorrow for me

For out of the moisture, and out of the earth. It weaves, in spite of its own life-dearth, A web of meaning above its bier:

And the light-winged soul to a far dawn While the heart speaks on to unseeing eyes-To die is yet to live.

marvelous loom is the human heart, For it weaves and weaves through the world of thought; In joy and sorrow, in life, in death,

An intricate cipher for man to know From his early smile to his latest breath He holds the key for his use below, But rarely wise is the one who learns: What the heart has taken, the heart reurns, Till the cycle of God is done. -[Kate E. Clark.

O'KANE'S GHOST.

An Old Army Officer Terrified by the Spectre of a Comrade Killed in the War.

"I don't believe in ghosts, spirits, or supernatural visitations of any kind,' said an old and well known army officer, who has been spending a few days in this city, "but that under certain conditions there are mysterious mesmeric, psychological, or occult influences brought to bear upon the human organism with the most extraordinary, startling and inexplicable results no man living has better reason to know than myself. I have never attempted to make the slightest endeavor to solve or understand these mysteries. I am content to believe that I was once the medium through which the result of this kind, the most amazing of any I have ever read of, either in alleged fact or acknowledged fiction, was accomplished.

"I was a lieutenant in the 14th United States regular infantry during the late war. As you may know, a great many dashing and ambitious young soldiers from the Papal army in Rome came over early in the war, and through the influence of Archbishop Hughes obtained commissions in the Union army. One of these soldiers, by the way, is now the son-in-law of James G. Blaine. With these, and still not of them, was a young Irishman, whom I will call Larry O'Kane. That was not his right name, and it was years before I learned what his name really was. I do not give it now, for reasons that will presently be ob vious to you. My regiment was stationed in the vicinity of Havre de Grace when this young Irishman was assigned to a li ranked him by one file. There was something about the boy—for he wasn't more than 20—that attached me to him at once. He was handsome, manly, he would be arrested and severely pun- and every inch a soldier. There was a peculiar reserve about him, and a melancholy that added to the interest his coming awoke in me. I was getting up a mess at the time, and I asked the young Irishman to mess with me, and he accepted the invitation. We were not long in becoming the best of friends. We shared all the comforts and discomforts of march and bivouac. While he was courteous and polite to all our comrades, he seldom talked me he never spoke about himself, except on the rare occasions I will mention. It was plain to me that there was a mystery of some kind connected with him, but although I might have had a pardonable curiosity to know what it was, I never permitted myself to tresit remain a mystery. The young officer always had plenty of money, which was by no means a usual thing with us soldiers in those days. He was free with his purse. He never drank, nor relieved the monotony of camp or the pockets of himself or comrades by that boon to mankind, a game of draw. He smoked, and his collection of meerschaums was a vision. Young Lieut. O'Kane, reserved, melancholy, and exclusive as he was, was beloved in the regiment from the colonel down to the

> last private in the rear ranks. "On one or two occasions, when we were expecting to be called upon to join in some looked for battle, and lay in our tent smoking and talking, he said to me that if anything happened

shots followed these presently, and we halted to consult on the best course to pursue, when I heard another shot. The sound never reached poor Larry's ears, for the bullet passed through his heart. He threw up his hands and fell dead where he stood. The moon shown full on his face, on which there was as sweet a smile as ever rested on human lips. Whatever the young Irishman's life troubles had been, they had evidently found a welcome ending. We buried our dear comrade where he fell, -- a duty we seldom had And out of the seed-germs nestling time to perform for others in the days that were coming, and while this was marauders. There were no other rebells in the vicinity, and the night's deadly marauded more.

"The death of the gallant O'Kane lantern was chiefly in use among the greatly depressed us all. As soon as I poor people. could bring myself to do it, I made an document appointing me his sole exec- reflector. utor. I found a Catholic prayer-book that had belonged to him. On the fly leaf was written 'From Sister to --The name that followed had been cut indicate who the young Irishman was,

cluded not to open the envelopes in the package until I could obtain legal advice. I forwarded it to the then proprietor of the Metropolitan hotel, in New York, who was an old and confidential friend of mine. I obtained leave of absence a few weeks later, went to New York, and consulted a lawyer well known to me then, and well known to the nation to-day. Together we opened the dead lieutenant's package, and imagine my surprise to find evidence that he was the owner of property in St. Louis and Chicago worth at that time not less than \$80,000. Then the folly of my not favoring O'Kane when he unmistakably wanted to tell me his history on the night he was killed, became apparent to me. Here was a fortune that by right belonged to some one to whom he intended it should go, and no clew to his or her identity. My lawyer assured me that I could claim and possess the property as executor, but I refused to do so. I placed the paper in the hands of the British consul in New York, with instructions to him to use every dollar of the income of the property in efforts to find out who the young Irishman was. I did not think of applying to the Catholic authorities, who might have had some knowledge of the dead man's

posit company, and I returned to my egiment "In the exciting times that followed I had but little opportunity to follow war I was sent out to Fort Pembina, modern lamps. in Dakota, being then a captain in the 15th infantry. One day we had been put through several hours of tedious

The word built is not out of place here, for these lanterns or whether he had any friends. I con- are twenty to thirty feet high and contain hundreds of candles. Their sides are often of rich colored silk.

"While in West Virginia recently." said a traveling man, "I saw a lamp that was primitive enough. A saucer was filled with grease and over the edge of it hung a lighted wick. It spluttered some, but made enough light to render the darkness visible, and its heat was sufficient to light the pipes of the family. It was more used for that purpose than any other, it appeared to me, though it was the only light in the house."

Lamp comes from a Greek wordlampas. The candles of scripture are supposed to have lamps in which olive oil was burned. The earliest lamps were shallow vessels of terra cotta, either round or oblong in shape. There was a small opening in the top in which the oil was poured; at one side was a handle and opposite a nozzle, through which the wick protruded. This form of lamp is often represented in pictures. Many of them were ornamented with representations of war scenes or chariot races.

Improved lamps were introduced about a century ago. A Frenchman named Argand in 1784 invented a burner with two concentric tubes, the inner one open for a current to pass history. The papers were deposited in through and the outer one contained Somebody soon found out that a glass chimney was better for that purpose. Argand's lamp, variously modified and up the O'Kane mystery, and after the improved, is the parent of all the best

She Wills Him to Bea Widower.

Something of a novelty in the way of wills came up in Surrogate's Court, in Kingston, lately. The will in question was made by a married woman. She devised the property to her husband during life in case he "remained unmarried". Men o.ten execute wills making a devise of property to their wives subject to the condition that they shall remain unmarried, but women usually give their property without any attempt at hampering their husbands' affections in the future. The will shows something of a change in the orthodox phraseology of wills of wives in devising their estates, and tends to show that women are becoming more independent in their ideas and more fully aware of their rights regarding property.—Kingston (N. Y.) Freeman. Keeps Mis Coffin Handy.

Dearer to the heart of college students than all public occasions of social life are the cosy private spreads. Only a college girl knows the meaning of a college spread. Is it a proof of the depravity of human nature that no spread is perfect unless held after 10 o'clock, when in the midst of the hilarity each feels the influence of a prospective summons from her corridor teacher to receive a sermon on the value of law and order. Try to imagine yourself an unseen spectator at a mysterious midnight spread. see a large room all ablaze with light, but with blinds shut and curtains drawn, and a gossamer waterproof draped carefully over the transom, lest the rays should annoy some outsider. Within is a medley. Books are to show them to any one at any time. out of the way for once, and the table This experience of mine is a true one. is covered with a miscellaneous collection of plates, saucers, glasses, a cup or two, a few spoons, rarely a knife and fork. Among these are scattered a loaf of bread, a bag of erackers, pots of deviled ham and jelly, a bottle of olives, a pitcher of milk, and another of oysters. Half a dozen girls were in the room, one of them anxiously inspecting the water in a tin basin that she is carefully holding over the flame of a drop-light. The rest are scattered about the room in attitudes more or less graceful. The bed, the chairs, and the rugs on the floor are equally patronized. All the girls are making frantic endeavors to evolve a theory as to the making of oyster soup, and as the theories gradally take definite shape they are hurled at the martyr of the tin basin. 'You must heat the water first, then

the milk, and put in the oysters just before it is done," remarks one sage cook from the depths of an easy-chair. "No, you don't! you don't want any ure of lanterns. They have used them water-just milk and oysters boiled together," says No. 2, coiled like a. kitten on a rug.

"You must heat the oysters separately," calls a grave, oratorical voice from among the pillows.
"Girls," said the martyr, looking

around with an heroic air, "you don't one of you know the first thing about it. I'm making this soup, and if you don't like it when it's done, you can come and make some yourselves. Just at present I have the floor.'

She confirms her statement by a vigorous gesture that threatens the equilibrium of the tin basin, and the others own themselves obliterated and apply their genius to other topics. The soup done, it is served in cups, or glasses, or saucers, and is pronounced perfect. The suffering martyr has become a smiling saint, and sits triumphantly on the edge of the table while someone spreads a cracker with jam for her benefit. The tide of fun rises. Again and again a laugh rings out, to be smothered in the midst by the tragic gasp: "Girls, somebody's coming!" But no one comes, and, after oysters have been eaten, college news discussed, and harrowing ghost stories told in the darkened room, the girls steal away with a reckless declaration that they have had fun enough to pay for a whole week's flunks. Lippincott's Magazine.

Blushing a Disease.

Blushing is a disease. No one blushes for shame. While the woman of the world may wear cheeks of marble, the innocent country lass is made the wick. He had a metal chimney to red by being looked at. A message of peace they may bring. But far on the deep there are billows That never shall break on the beach; And I have heard songs in the silence That never shall float into speech; And I have had dreams in the valley Too lofty for language to teach.

And I have seen thoughts in the valley-Ah, me! how my spirit was stirred! And they wear holy veils on their faces-Their footsteps can scarcely be heard; They pass through the valley like virgins, Too pure for the touch of a word.

Do you ask me the place of the valley, Ye hearts that are harrowed by care? It lieth afar between mountains, And God and his angels are there: One is the dark mountain of sorrow, And one the bright mountain of prayer. - Father Ryan.

THE BASILISK.

A STORY OF TO-DAY.

CHAPTER XXX.—CONTINUED.

A CHECK. I suppressed with difficulty an indignant desire to put Harper right in his view of the relations of the fugitives, but there

was no time just then for explanations, and we were soon threading our way through streets of tall houses. Presently we emerged into a large square. The bells of the Cathedral and of innumerable churches were chiming, and I looked with some admiration at the pictures que novelty of the scene, being, like many Englishmen, especially struck with the old world figures ef the clergy. Two or three venerable looking priests passed us as we crossed the We walked the three of us together, conversing casually about the aspect of the town, being, perhaps, too anxious to talk about the business immediately at hand. Suddenly I caught sight of a figure in the habit of a priest emerging from a street some yards ahead of us, and rapidly crossing the end of the square. An instruct brought me to a momentary ston; an impulse drove me to rush straight

at the venerable figure.
"Flowitz! Villain! Where is Mary?" I eried as I clutched at the throat of the

At my cry the seeming priest gave a start backwords, avoiding my grasp, but knocking off in the violent motion the broad beloamed hat which had been drawn well down over his brows.

Instinct was right. It was Plowitz. There was a strange light of fear and resolution combined in his wicked looking eyes, and a curious smile on his lips, such as I had never seen before. He answered never a word, but flinging out his left arm, he struck me with some weight in the chest, and with his right hand fired a revolver full at me. I staggered from the blow with which he checked my rush, and as I staggered, I heard the bullet whistle past my ear, and a crash of glass behind me showed that it had gone through the window of some good citizen of Antwerp. Ere he could are another shot the wretch was seized and disarmed. The odds were great, and he made no attempt at a struggle, but I saw a hungry gleam of terror and despair in his eyes that made amends for some of the harm that he had done. He was secured, and the crowd which had instantaneously gathered, was in some

"You have found me," he said; "you

must find her.' Where is she?" I asked sternly. "That," said Plowitz, half closing his eyes, and smiling through the palor of his

EXPECTATION.

At the very moment of his downfall, while he was actually at last in the hands of the Belgian police, to whom, in common with the force in most European countries, his capture had for a long time been a mies, at least, the triumph of complete | matter with monsieur?" revenge. Through all the manifest tokens that he not only appreciated but even enjoyed, my terrified anxiety for Mary, my fury with himself.

did not realize to the full the strength of his position until I had had a conference on the subject with the police authorities. The chief official was exceedingly courteons and sympathetic. Plowitzwas calmdefiant, and spoke throughout of Mary in a tone of proprietorship which did not tend to promote any judicial calmness of demeanor in me. He did not, as I had partly expected, refuse to say anything at all on the subject. On the contrary, he gisted that I had no right whatever to question his conduct and no locus standi whatever in the affair. The lady had been my mind. confided to his safe conduct by her guardian, Mr. Beaufoy, a rich and influential He had fulfilled his cust, and placed the lady in safe keeping. When any proof of foul play came to light the police would be able to act without y prompting from an excited outsider. their help should be claimed by Mr. Beaufoy, or any of the lady's relatives, he would be happy to give them information. In the meantime he protested against this Tensive interference with his private affairs, and must decline to say anything

The authorities were quite prepared to believe any evil of their prisoner, but they were equally impressed, I could see, with the logical weakness of my position. Taking what comfort I could with me front general promise to keep a watch over my interests. I departed with a heavy heart in

company with Shaw. "Come," said my good friend, "never despair. You couldn't exactly expect our friend to play into our hands after all, and give up the only source of power that remains with him. But I don't believe in mysterious disappearances. We shall certhinly be able to trace Miss Fortescue.

I could not take a hopeful view of the case. I had all along, foolishly enough, imagined that when Plowitz was found Mary would be found, and the disappointseent was as great as the latent hope had

At this moment, Harper, Inspector Rosebush's agent, who had remained be-

hind at the police station, caught us up.
"By-the-by," said Shaw suddenly, "I
suppose Miss Fortescue is not at the house to which we were going, when Plowitz

saved us the trouble by meeting us?" "No," said Harper; "I inquired. No lady had been there.

But you can trace their movements from landing. Yes, sir. That's just what I'm about

Shaw was now urgent that we should leave this part of the inquiry for the present in the hands of professional detectives, and take some much needed refreshments

Harper promised to bring a full report If proceedings as soon as he had concluded reakfast, calling on the way at the office a projecting doorway and watched.

If an English solicitor by direction of [TO BE CONTINUED.]

H rper. Once again the salient points in COUNTRY LIFE AND WORK. the story of Mary': abduction were de-tailed, and Mr. Leverett, the solicitor, was commissioned to obtain an interview with Plowitz and see if there were any practicable conditions on which he would consent to aid in her restitution.

Mr. Leverett returned. "I am afraid," he said, "that there is nothing to be hoped from that man—at present, anyhow. He cynically declares that there will be enough charges against him to swamp any considerations of

We had not finished our repast before

clemency on the score of his revealing the lady's abode. And the strongest point, and one on which he seems to dwell with much unction, is that she was committed to his care by her guardian, and that, till the guardian requires an account from him, no one has a scrap of right to inter-

This was the same dismal tale over again. We sat in silence, whill a gust wind whirled the dead leaves round out side the window of the salle-a-manger, and the Cathedral chimes clanged out a chorus from Marta.

"No," continued Mr. Leverett, wrinkling his forehead, and pursing his lips, as if to accompany the chimes with a silent whistle; "no; I don't see what is to be done unless you can get hold of the guardian and bring pressure to bear on Plowita through him, and meantime endeavor by all means to trace and communicate with the lady herself.'

"That's just what we are doing," said I And having arranged the report pro cess, and received a hearty promise of Mr. Leverett's utmost aid, Shaw and l were again left to our breakfast and our reflections. Mine became intolerably anx ious. Shaw, blessed with a more phleg matic temperament, and not so deeply in terested as I was, was able to enjoy the guasi-tranquility of a man who feels that all that is possible under the circumstan ces has been, or is being, done, and enjoyed some well earned repose. I wandered about aimlessly, now seeking to detrace my mind with a little sight seeing, now with a general observation of the street, of a strange city. But I could never keep long away from the hotel, lest Harper should return, and after a while gave it up in despair, and passed the time as best I could, waiting at the hotel.

At length Harper returned, and I listened in breathless suspense to his report. He had traced Plowitz and Miss Fortesque, first to a hotel near the quay, where he had passed the lady off as his invalid sister, and then to a very respectable house, where furnished rooms were let He had taken rooms for himself alone here, stating that his cousin-for so he now called his companion—was waiting to be fetched by some friends. In a sh time a Sister of Mercy had called, and had gone away with the lady in a cab. Plowitz had gone out shortly afterwards, and had not returned. Where he had assumed his disguise as a priest, and whither he was bound when we accidentally crossed his path, and I instinctively recognized him. Harper had not yet found out, nor did he care to know. Shaw and I looked at one another with great relief. Mary was to some extent in safety. She was in the care of good women, and whatever might

sure of her kind treatment. I could not rest, however, without seeing for myself the place where she had so lately been, and following Harper's directions. I, after some wandering, arrived at

The good landlady, warmed with sympathy, and opening the heart of her garrulity to an interested listener, described graphically enough the incidents of Mary's short sojourn under her roof. The lady, she said, seemed distrait and sad; she "You villain!" I cried, "what have you had been weeping, and would take nothing. The gentleman was very polite and

attentive, but not sympathetic.

"And the Sister," I asked, "the lady who

took her away-did she seem kind?" The woman shook her head, and deprecatingly raised the back of her hands. moderately and continue so until no on hinges; so does the tail. A cow is saw her, but the lady had great power and a good pace, without stopping till the persuaded her. The gentleman said she must either stay with him or go with her, and then the young lady seemed very angry, and went away with the tall Sister.

What was the Sister like?" "She was tall-very tall; like so many of the English women."

"English! "Yes, certainly English; and very handsort of day-dream—at the time when he evidently considered that the game was up. Plowitz enjoyed over one of his enenot good, those eyes! Ah, what was the

I started and turned pale. What if this of his discomfiture and fear, it was evident that he not only appreciated but even enwhich seemed to put it beyond doubt. "And the carriage in which they went

It was an ordinary carriage. She had

not taken any particular notice of it.

"And where had they gone?"

She did not know. The lady had given no directions. The driver seemed to know, are generally used not alone because

for he drove off at once. prey to devouring anxiety. Shaw, too was much moved by this latest develop ment. He begged me, however, to sis down and rest, and endeavor to compose

"No," I said, "it is impossible; I must go out. It is the only resource I have now. I must find Mary!"

"But," said he soothingly, "you can't expect to find her by walking about the streets of Antwerp at random."

"Why not?" I said, "I found Plowitz by acc dent this morning. I may find Mary by accident this evening." And out I went. As I pursued my vague quest, the clear

light that precedes sunset on a windy evening brought every object out in startling relief. The leaves were flying and whirling around; masses of clouds, amber and grey, were confusedly rolling across the carefully selected few seeds for the ned, because it is said to the sky; the rooks were cawing about the amateur and specialist seeking new horses' hoofs dry and brittle. towers, and the strange music of the chimes rang out fitfully upon the battling breeze. I felt a sense of Janger, and, passing a shop where a large array of sticks caught my eye, I stepped in and purchased a serviceable life preserver. I wandered about for some time aimlessly enough, but by degress I bent my steps in the direction of the house whence Mary had been moved by the Basilisk. Two or three times I paced the street, hoping, it may be, that some inspiration would draw me in the direction which Mary had taker, and then plunged at random into a laby rinth of narrow streets paved with cobblestones, ill-smelling, and framed by high old-fashioned, and dilapidated houses. The dusk was now rapidly falling, though occassional gleams of red light brought the outlines of the gables into weird distinctness as the rack and vapors were swept by a strong rush of wind from the face of the

still glowing west. In the gates of the courtyard by which entrance was obtained to most of the houses in this region, a few people here eggs each and raised broods. and there lingered, picturesque groups occassionally, homely and honest folk, having a little gossip after their day's work, but more often ill-favored and sordid bewrinkled old hags, bold faced women, and hulking ill-favored men in blouses.

In the cloud swept sky I caught a glimpse of a pale moon, and then suddenly, in clear tw.light, there emerged from a gateway not fifty yards ahead of me a ngure which brought me to a standstill-a is investigations to that best of inns, the tall figure of a woman in long dark robes. Total St. Antoine, whither we now directed I could not be in staken in that form. It steps, engaged rooms and ordered was the Basilisk! I sought the shelter of

THE NIGHT MIST. All the nightlong the gray embracing mist Has held in tender arms the tired world; The sleepy river its soft lips have kissed, And over hills and meadows it has curied.

Its white, cool finger it has gently placed On weary stretches of deep, drifting sand; 'he noisy city and the far-off waste Have felt the benediction of its hand.

The drowsy world rolls on towards the day; The fresh, sweet wind of morning softly blows; The willing mist no longer now may stay; With first expectancy of dawn it goes! -MARGARET DELAND, in Harper's Magazine for

DON'T LEAVE THE FARM.

Come, boys, I something to tell you;
Come near, I would whisper it low—
You are thinking of leaving the homestead Dont' be in a hurry to go The great stirring world has inducements,
There is many a gay busy amadt,
Ent wealth is not made in a day, boys, Don't be in a hurry to start

The farm is safest and surest. The orchards are yielding to-day; You're free as the air of the moutains, And monarch of all you survey: Better stay on the farm awhile longer,
Though profits should come rather slow;
Remember, you've nothing to risk, boys, Don't be in a hurry to go.

FEEDING THE CALF.

white necktie, carefully polished his boots and smoothed his old plug hat with a silk handkerchief when his daughter ejaculated: "Law sakes, pa, you have forgotten to feed the calf.

A momentary cloud crossed the good man's brow but he wearily plodded to the barn filled a bucket with meal and milk and water for the forgotten animal, who, plunging his head into the receptacle, guzzled the contents rapidly down. Then raising his black muzzle he shed a shower of mush all over the good man, drenching his treasured trousers and extinguishing at once the brilliant polish of his boots. With a look of anguish at his bedrabbled dress, and a murderous glance at the cause, now switching his tail and mildly staring at him, the worthy pastor groaned: I was not a humble follower of the meek and lowly One I would knock your blanked head through that bucket, wended his way into the house for re-

WHY THE BUTTER DOES'NT COME.

1st. Because of some disorganized or unhealthy condition of the cow. 2d. On account of the unwhole rome food and water supplied.

3rd. Want of proper cleanliness in milking and setting the milk. 4th. Lack of right conditions in the be her guardian's subsequent plans for her, we should have no difficulty in finding

raising of the cream-pure air and tained, the judicious use of it is improper time-kept too long. her now, and meantime we could feel quite The cream not raised and skimmed in due time.

6th. Cream not churned at the proper time-kept too long. 7th. Cream is allowed to freeze—injured still more in thawing.

8th. Cream too warm when churn- mistake.

9th. Cream too cold. 10th. Churn not a good one. Some persons have the churn around nearly all day, summer or winter: take

g lady seemed terrified when she more vent is needed, and then go on at butter comes. When the cream is perfect and the temperature is right, about sixty-five degrees in winter, for a thirty five pounds, twenty to twentyfive minutes should be ample time for churning. In the winter season I should expect to find the cause in the reason given above in No. 4 to No. 9.

-Practical Farmer. THE BEST SEEDS FOR PROPAGATION.

Nursery men are well aware that seeds of the best and choicest apples are not best for planting. All that is wanted is strong, vigorous stock and this is best secured by planting seeds of the small, inferior varieties, too poor for anything except making cider. These they are easiest to get, but because I returned to the hotel, once more a they are the best. If we wished fruit from these seedlings only seeds from the best flavored varieties would be planted; but as the propagator invariably grafts these, then the kind of fruit the edling might bear isimmaterial. The chief drawback to this method of getting trees is that it gives little opportunity for valuable chance seedlings which used sometimes to be obtained Perhaps, however, it is as well that improved varieties of fruits should be bred, for by selecting seeds from the choicest kinds, and by cross fertilization, much of improved stock is bred. This will make two kinds of seeds, each best for its respective purpose, one including the great bulk of seeds from inferior

> THE AVERAGE NUMBER OF EGGS. There are 365 days in a year, and of that number we must deduct 100 days as the molting period, as it usually requires about three months for a hen to shed her feathers and put on new ones. We have 265 days left. As no hen can lay an egg every day, it is apparent that the hen that lays 200 eggs in a year cannot stop to do much work in hatching; she must not become sick, and she cannot afford to lose any time. If a hen lays ten dozen eggs a year (120) she very nearly lays one every other day. and if she does that, and raises a brood. she is performing good work. For flock, where good layers and inferior layers are together, we should not be

SELLING BUTTER PROMPTLY.

No farm product of equal value is more unsatisfactory to hold for a rise than butter. Its price, when newly made, is nearly always the best. It is subject to greater deterioration in quality than any other product, must suffer some in comparison with that which is freshly made. The old-fashioned dairy butter made in June used to be good for a twelvemonth if packed in sweet crocks and covered with salt brine to Bake with two crusts.

exclude any odors. There is little such butter now. That made by the creamery process is first-class while fresh but lacks keeping qualities. As nearly all enterprising dairymen have creameries, there is less really good butter made from milk set in the oldfashioned way than formerly.

SKIM MILK FOR COWS. There are many times in butter dairies where the most profitable use of skimmed milk is to feed it again to the cow which has given it. The milk, after the cream has been taken from it retains the elements that most cows find deficient in their food. plenty of grain the cow can easily supply the carbon or fat-forming elements of her milk, provided she can get the caseine and albuminous portions which the skim-milk furnishes. It is the drain of these that hurts cows most and they should be supplied, if not in skim-milk, then in some other food equally nutritious.

CHANGING HORSES' COATS. While horses are shedding their coats they should be well fed and not overworked. It is important to have the new coat on before active farm work begins, as the changing process is debilitating. Thorough grooming at this The good village pastor was ready time is very important and there should for church. He had donned his "suit at all times be work enough to prevent of solemn black," tied his rather limp the muscles from becoming weakened by disuse. Unless horses have some work in winter the fat they then put on

will do them little good, besides the cer-

tainty that the shoulders will call when

the horses are put to hard pulling. KEEPING FERTILIZERS IN STOCK. Team help is too valuable at seeding time to stop the team and take a man's time for a day to draw a load of phoshate which might just as well be drawn before the busy season opens. Farmers who use phosphate should make an estimate of the amount they need or can afford, and draw it early, so as to have ready when needed. If kept dry t will not deteriorate, but rather improve, by keeping over one year.

KEEP UP WITH THE TIMES.

It is said that the celebrated Bakewell, who has done much to advance the agricultural interests of England, blank you" And then he sorrowfully once advised the young farmers to spare no pains to know what they are doing." This may be accomplished by associating with other farmers and learning their methods, their successes and failures. Many new ideas can be obtained by a friendly interchange of thought. Success in agriculture demands a fair knowledge of all the real improvements in husbandry, of labor-saving machinery, the preparation of soils, of manures and their application; but when the knowledge is obportant. Much can be obtained by associating with other farmers, and by observation, and much by the reading and study of agricultural literature. The farmer wbo hopes for success without keeping up with the times, will be likely to discover an important

COMPOSITION ON THE COW.

Here is a little girl's composition on 11th. Lazy hand at the churn, the cow: A cow is an animal with four legs on the uuder side. The tail is a few turns and stop; fool around and longer than the legs but its not used to begin again. Cannot make good butter stand on. The cow kills flies with her Use a box or barrel churn; begin tail. A cow has big ears that wiggle bigger than a calf but not as big as an elephant. She is made small so she can go into the barn when nobody is looking. Some cows are black. And some hook. A dog was hooked once. batch of butter weighing twenty to She tossed the dog that worried the cat that killed the rat. Black cows give white milks so do other cows. Milkmen sell milk to buy their little girl's Which they put water in and dresses. Cows chews cuds and each cow finds its own chew. This is all there is

CHAT FOR THE WEEK.

Try a patch of oats and peas for fod-A bushel of peas to two of oats will do for an acre, though many give a heavier seeding.

The most transparent lie used by the devil for the promotion of vice is that gambling is neccessary to "improve the breed of horses.'

In planting your grape and currant cuttings see that the earth is pressed firmly about them, particularly at their base. This is essential. A Texas man writes that he is successfully feeding his cattle on caetus in con-

nection with cottonseed meal. He runs the cactus through a cutter. Beef cattle are twenty-five to fifty cents lower in the Chicago yards than one year ago, and rather more than that

much lower than on the corresponding in 1885. Dry sawdust absorbs so much liquid (three times its own weight) that it makes the best of bedding for cow stables, but for this very reason its use fruit for producing stocks, and the other in horse stables is sometimes condemthe carefully selected few seeds for the ned, because it is said to make the

> HOUSEHOLD HINTS. Never have a sink under a window if you can avoid it.

> Keep lemons in a jar of water, to be renewed every few days. Moisture is the greatest enemy of the piano, and it cannot be too carefully

> guarded against. Hard soap should be kept in a dry place several weeks before using. It will last much longer.

Never have dark furniture for the kitchen; it shows dust much more than light and requires double the care. Do not use cracked dishes; they absorb oils or fats from different kinds of food

which render them unwholesome. Ingrain carpets need to be shaken oftener than Brussels, as from their more open weave the dust percolates through them. Orange pie-Take the juice and pulp

of two large sour oranges and the gra-

ted rind of one, a cup of sugar, one egg, a coffee cup of water and two spoonfuls of rice flour; mix these ingredients and bake with two crusts, making the paste very rich. Lemon pie-Express the juice from two lemons, then chop the peel and

pulp fine, after removing the seeds: beat an egg well, add two-thirds of a cup of flour stirred into three cups of water, two and one-half cups of sugar; mix all together, and fill three pies

Political Nicknames.

There has been no striking nickname since 1860, except that gixen involuntarily to Blaine by Bob Ingersoll, "The Plumed Knight." Grant was known in the army simply as "The Old Man".

Fremont was idolized as the "Path finder," but perhaps the most catching motto of his canvass was that invented by some inspired genius, "Fremon, and Jessie," and there were thousands of men who voted for Fremont on account of Jessie.

Lincoln was characterized as "Old Abe". "Uncle Abe, the Rail-Splitter," but only one of his three antagonists had a nickname. That, however, was splendid, "The Little Giant." It was worth as much to Douglas as many of his speeches. In 1848 the democrats nominated

Gen. Cass. He was not a man to idealize by a nickname. But Taylor was a character that suggested plenty of them. "Old Buena Vista" gave a hint of his military renown, but the sobriquet that was in every whig's mouth during the canvass was "Rough and Ready" In 1844 "Harry of the West" was

the whig watchword used, and it aroused an enthusiasm fully equal to that displayed for "Old Tip" in 1840. The democrats had nominated a man whom it was impossible to apply a sobriquet to. He was not well known. His personality aroused no enthusiasm, and the best they could do for Polk was to cry: "Polk and the Tariff of '42."

Martin Van Buren went into the white house after a splendid canvass, in which the nickname of "The Little Magician" played a potent part. William Henry Harrison was then beaten by the "Little Magician," but four years later there was a canvass for the presidency that can only be described as magnificent. Every citizen was made to feel his sovereignty in it. It was a cyclone of political activity. Harrison was nicknamed, and in every cross-road corner men shouted for "Tippecanoe and Tyler

It is said that Jackson rejoiced in his sobriquet of "Old Hickory". How he earned it is in dispute, but once earned it stuck to him until his death and is one of the few nicknames of the past that have not been forgotten. It was the first to be carried into a presidential canvass, and it was potent because it represented an idea. drew Jackson represented force, courage, virility, popular government without the frills and the ceremonials of the foreign courts, energy, and genuine democracy strengthened by experience.

Elizabeth Stuart Phelps has a woman suffrage novel in hand. Seemingly Eradicated

With repeated and powerful doses of quinine, chills and fever, in some one of its various forms, springs into active existence again, often without the slight est apparent provocation. To extinguish the smoldering embers of this obstinate and recondite malady, no less than to subdue it when it rages fiercely in the system, Hostetter's Stomach Bitters is all sufficient. When every resource of the pharmacopæia has been exhausted against it in vain, the Bitters Nay, more, the Bitters will protect those brought within the influence of the atmospheric poison that egets malarial disease, from its attacks. Disorders of the stomach, liver and bowels, are among the omplaints to be apprehended from the use of niasma-tainted water. These are both cured and prevented by the Bitters. Rheumatism, constipation and renal complaints, yield to its action.

THURSDAY, MAY 19, 1887.

CHRISTIAN HEATHENISM. We have lately spent considerable time in reading a book which has been without exception the most depressing reading that we have ever encountered. "Prophetic Studies," it is entitled, consisting of the addresses delivered at the international prophetic conference in Chicago last November. It embraces thirty-seven papers, filling 216 large octavo pages. The theme that runs through them all is the near, literal and personal coming of the Lord to earth in visible and tangible form, together with the appalling woes to fall upon the race, and the salvation of a choice few. The picture presented of the tendency of the time, the outcome of religious and philanthropic effort, the state of the church itself, and the fate shortly to come upon the people of the earth, is simply awful. All this, however, would attract small attention from us, and would not suffice to make the book depressing to us, but for the names attached to the papers. There have been cranks and fanatics before, and we have merely pitied their vagaries; but when such monstrous and shocking teachings are put forth by isfactory to a large proportion of those some of the most eminent Christian who cast their votes for the prohibi teachers of our time, holding up as the object of the world's adoration a deity It raises the present tax of \$200 for more cruel and vengeful than any heathen system ever conceived, the effect | tax of \$500, makes the tax a lien upon upon any man not destitute of benevo- the stock and fixtures, fixes the amount lent thought, must be depressing. The

This formidable list might be extend-

list embraces such names as these:

This formidable list might be extended; and these men, interpreting the criminal classes, will remain. The prophecies of Daniel and the Apoca- intermediate class of saloons, princilypse by the severest literalism, present such views as these:

such views as these:

This dispensation will end in diabolical wickedness and well nigh universal apostasy, amid the erash of abocalyptic thunder and the unparalleled judgments of God * in utter failure of man's hopes to redeem the world by the preaching of the gospel, and that the impending judgments of God would fall upon a faithless church and a guilty world and thus close the scene. * Nearly all christendom will be leavened with false doctrine; it is already rapidly working. * The nominal church, with a baptized profession and a form of goddioess, will pass into if not through the great tribulation period, and with the whole world will drink of the cup of the fierceness of the wrath of God Almighty. * The seven judgment bowls are poured out upon the earth, all nature reels with signs of woe, the earth quakes in all her parts, and the cities of the nations fall—Rome falls, Chicago falls, God has arisen to shake terribly the earth. Salan's wrath is great, his time is short, the nations blaspheme, the squadrons are gathering in the valley of Armageddon. God and anti-God, Christ and anti-Christ have come—it is "the battle of the great day of God Almighty." The beast and the false prophet are cast into the lake of fire, Satan is bound for a thousand years, and the millenium has begun. Such, my brethren, will be the condition of the church nominal and the world when Christ comes with all his saints to take to himself his great power and reign. * This dispensation is destined to grow worse and worse; a remnant will be saved out of it—only a remnant.

Thus Mr. Frost of Sacremento cheer-

Thus Mr. Frost of Sacremento cheerfully views the unutterable love of God, and the matchless wisdom and beneficence that created this world with full foreknowledge of all that should come

If is an error to suppose that the world in donsequence of any increasing progress in the propagation of the Christian faith, will thereby be transformed into the promised kingdom of God on earth. On the contrary, at the very time when the gospel is preached as a testimony in the world, a "falling away" from the Christian faith will prevail, and this will continue as the gospel ad vances until, in the closing scenes of our age, out of this apostosy the Antichrist, the "man of sin," is revealed.—Prof. Koch, Saxony.

Then "all Israel." Israel in their solidarity. Then "all Israel," Israel in their solidarity, acting nationally as one man, shall be saved.—Prof. Godet, Switzerland.

Pity the unlucky Israelite who shall have gone to his doom before this wholesale salvation could take him!

Two frightful alternatives will confront men when the Antichrist is present: One is, either men must worship the Beast or die. The other, either they must worship God, utterly repudiating the diabolism of the Beast, or be tormented with fire and brimstone forever and ever. Death in this world or damnation in the next; that will be the dread choice of men when the Beast is here!

This is the winning theology drilled into future preachers by Prof. Morehead at Dayton.

In order to deal with earthly monarchs, a resident ambassador is often necessary, to conduct delicate and difficult negotiations in person, so that our cause may be properly understood, and be supported by skillful arguments. As soon as He arrived there, He sent some measure or installment, as Pentecost witnessed.—Rev. F L. Chapell, Bap., Flemington, N. J. Mr. Kennedy thinks it is so with God.

"As soon as he arrived"! What crude notions of Omnipotence! God, indeed, did undertake the establishment of a perfect government in the earth. Man, his chosen people caused the attempt to fail.—Prof. Stroeter, Missouri.

The Almighty checkmated by mortals! These quotations, taken almost and Oratory, located in Philadelphia at random, might be extended to the and established by Prof. J. W. Shoecapacity of a dozen newspapers, and from nearly all of the eminent teachers named, and several others. They do not all agree. Some think that Rome is Antiehrist; others that Antiehrist is an individual man yet to appear. Several of them make Armageddon a literal armed conflict between human armies—the hosts of the devil and the saints of God! The most who spoke on that point consider the command to be to evangelize—that is, to preach to, not to christianize, the heathen—preach to them as a witness against them, so the the "day of the Lord" may hasten, the "day of the Lord" may hasten, the "day of the Lord" may hasten, we congratulate the students, teachers, when they shall be destroyed; for not lawyers and preachers of Michigan and till the gospel has been preached to all, can the Lord come! And nearly all insist upon a literal earthly kingdom, with Christ on a local throne, and the saints as reigning princes, or something of that sort!

We cannot treat with either patience

The Upsilantian. see some of the names that subscribe to those teachings It seems to us that no one who has any intelligent regard for the success of Christianity in the world; who has the faintest conception of the meaning of those passages that declare the divine love, mercy, compassion, or even justice and wisdom; who does not regard the Almighty as the embodiment of vengeful cruelty by all human standards; who sees anything. in fact, in the Christian doctrine that ought to attract any lovable human soul-it seems to us that no such can fail to cry out in horror and detestation against the utterances of the so-called Prophetic Conference, and to pray that its threatened future meeting be never held. It is small wonder, when such ideas are taught in theological seminaries, and such views of God obtain in pulpits, that coldness in the churches and indifference without should prevail, and that the great mass of the people in Christian countries should stand aloof from Christian institutions. Such Christianity never never converted anybody; and the people to whom the name is dear are Congress

people to whom far different views

have been presented.

THE liquor tax bill passed by the House of Representatives at Lansing, last Thursday, will not, we think, be sattion amendment at the recent election. beer and \$300 for whisky to a uniform of bonds at \$3000 to \$6000, and requires the sureties to be residents of the city. yillage or town where the saloon is located. We some time ago lost faith in the value of high license as a means of lessening the evil of drink, and unless the Legislature shall add to this a local option feature we shall not anticipate any great improvement from it. The present bill, if it shall become a law, will undoubtedly reduce the number of saloons; but enough will remain to supply all demands, and those that cease to exist under it will be the least objectionable class. The "gilded palace," that our young men find seductive, and the low dive that harbors the pally small German beer shops, conducted on small capital, and quite com-

have been sufficient to populate a state numerically greater than the average population of a half dozen states of this Union. There is food for profound reflection in such a fact as this, and the question of the wisdom of restricting the present free immigration from the old world will very soon compel the serious recognition of our statesmen and people. Especially must this be true in view of a feature of this immigration most graphically touched upon in the address of an employing Cor. Pearl and Washington Streets, Ypsilanti. mechanic before the master carpenters' association in Chicago last Saturday He said:

"The question of apprenticeship is of the utmost importance. Our boys should be at work. I see old soldiers present who twenty-five years ago were engaged in far different work from that of to-day. With muskets on their shoulders they were fighting the battles of their country. Suppose one of their sons should get upon a scaffold to day and commence laying brick. An organization of men many of whom are not three months from a foreign country band together and deny him the right to work, and refuse the old soldier father permission to employ his own son. The "ather permission to employ his own son. The right of free labor must be maintained. Do toot lay down this contest until the right of ev-ery American boy to learn any trade at which the can get work is fully and completely recognized."

Our blessed Redeemer has not gone to heaven to stay there. He has gone there for the benefit of his militant church, to enlarge the scope and multiply the blessings of his high priestly mediation, by appearing in the presence of God for us.—J. S. Kennedy, D. D., Abingdon, Va. This is a familiar feature. The Chibe not sustained in resisting this unamerican outrage and establishing the right of every American boy to learn a trade and to work at it after it is learned, wherever he can find employment.

THE Orange riots at Toronto on Tuesday, added to the notorious riots popular that the rioting propensity among Irishmen was chiefly confined to the Catholic portion.

AYER'S Sugar-Coated Cathartic If the Liver becomes torpid, if the bowels are constipated, or if the stomach fails to perform its functions properly, use Ayer's Pills. They are invaluable.

For some years I was a victim to Liver Complaint, in consequence of which I suffered from General Debility and Indigestion. A few boxes of Ayer's Pills restored me to perfect health. — W. T. Brightney, Henderson, W. Va.

For years I have relied more upon Ayer's Pills than anything else, to

Regulate

my bowels. These Pills are mild in action, and do their work thoroughly. I have used them with good effect, in cases of Rheumatism, Kidney Trouble, and Dyspepsia.

—G. F. Miller, Attleborough, Mass.

'Ayer's Pills cured me of Stomach and Liver troubles, from which I had suffered for years. I consider them the best pills made, and would not be without them.— Morris Gates, Downsville, N. Y.

I was attacked with Bilious Fever, which was followed by Jaundice, and was so dangerously ill that my friends despaired of my recovery. I commenced taking Ayer's Pills, and soon regained my customary strength and vigor. — John C. Pattison, Lowell, Nebraska.

Last spring I suffered greatly from a troublesome humor on my side. In spite of every effort to cure this eruption, it increased until the flesh became entirely raw. I was troubled, at the same time, with Indigestion, and distressing pains in

The Bowels.

By the advice of a friend I began taking Ayer's Pills. In a short time I was free from pain, my food digested properly, the sores on my body commenced healing, and, in less than one month, I was cured.

—Samuel D. White, Atlanta, Ga.

1 have long used Ayer's Pills, in my family, and believe them to be the best pills made.—S. C. Darden, Darden, Miss. My wife and little girl were taken with Dysentery a few days ago, and I at once began giving them small doses of Ayer's Pills, thinking I would call a doctor if the disease became any worse. In a short time the bloody discharges stopped, all pain went away, and health was restored.

the very best remedy. Every bottle sold has given relief in every case. One man took six bottles and was cured of Rheumatism of 10 years' standing," Abraham Hare, druggist, Bellville, O., affirms: "The best selling medicine I have ever handled in my 20 years' experience is Fleetric Bitters." years' experience is Electric Bitters."
Thousands of others have added their testimouy, so that the verdict is unanimous that Electric Bitters do cure all diseases of the Liver, Kidneys or Blood. Only a half dollar a bottle at Smith's Drug Store. abstruse subjects. The latter finally

EXCITEMENT IN TEXAS. Great excite ment has been caused in the vi cinity of Paris, Tex., by the re markable recovery of Mr. J. E. Corley who was so helpless he could not turn in bed, or raise his head; everybody in bed, or raise his head; everybody said he was dying of consumption. A trial bottle of Dr.King's New Discovery was sent him. Finding relief, he bought a large bottle and a box of Dr.King's New Life Pills; by the time he had taken two boxes of Pills and two bottles of the Discovery, he was well and had gained in flesh thirty-six pounds. Trial bottles of this Great Discovery for Consumption free at Frank Smith's.

became angry, and obstinately refused Free Trade.

The reduction of internal revenue and the taking off of revenue stamps from Proprietary Medicines, no doubt has largely benefitted the consumers, as well as relieving the burden of home manufacturers. Especially is this the case with Green's August Flower and Boschee's German Syrup, as the reduction of thirty-six cents per dozen, has been added to increase the size of the bottles containing these remedies, thereby giving one-fifth more medicine in the 75 cents size. The August Flow-er for Dyspepsia and Liver Complaint. and the German Svrup for Cough and Lung troubles, have perhaps, the larg-est sale of any medicines in the world. The advantage of increased size of the bottles will be greatly appreciated by the sick and afflicted, in every town and village in civilized countries. Sam-ple bettles for 10 centra remain the same ple bottles for 10 cents remain the same

WATERMAN, THE PHOTOGRAPHER

Has secured the services of Mr. JERTZ, of Schrimpel & Spellman's of Germany, and later of Bigelow's of Detroit. No cheap or inferior work is allowed to leave this studio, and the citizens of Ypsilanti may justly take pride in giving him their patronage. Call and be convinced.

WATERMAN'S, CONCRESS STREET

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC R'Y By reason of its central position, close relation to principal lines East of Chicago and continuous lines at terminal points West, Northwest and Southwest—is the only true middle-link in that transcontinental system which invites and facilitates travel and traffic in either direction between the Atlantic and Pacific. The Rock Island main line and branches include Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, St. Joseph, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Ifiuneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns and villages.

THE GREAT ROCK ISLAND ROUTE

Guarantees Speed, Comfort and Safety to those who travel over it. Its roadbed is thoroughly ballasted. Its track is of heavy steel. Its bridges are solid structures of stone and iron. Its rolling stock is perfect as human skill can make it. It has all the safety appliances that mechanical genius has invented and experience proved valuable. Its practical operation is conservative and riethodical—its discipline strict and exacting. 'he luxury of its passenger accommodations is unequaled in the West—unsurpassed in the world,

ALL EXPRESS TRAINS between Chicago and the Missouri River consist of comfortable DAY COACHES, magnificent PULLMAN PALACE PARLOR and SLEEPING CARS, elegant DINING CARS providing excellent meals, and—between Chicago, St. Joseph, Atchison and Kansas City—restful RECLINING CHAIR CARS.

THE FAMOUS ALBERT LEA ROUTE Is the direct, favorite line between Chicago and Minneapolis and St. Paul. Over this route solid Fast Express Trains run daily to the summer reserts, picturesque localities and hunting and fishing grounds of lowa and Minnesota. The rich wheat fields and grazing lands of inter.or Dakota are reached via Watertown. A short desirable route, via Seneca and Kankakee, offers superior inducements to travelers between Cincinnati, Indianapolis, Lafayette and Council Bluffs, St. Joseph, Atchison, Leavenworth, Kansas City, Minneapolis, St. Paul and intermediate points.

All classes of patrons, especially families, ladies and children, receive from officials and employes of Rock Island trains protection, respectful courtesy and kindly attention.

Latest From Lansing. SENATE.

The Senate on the 4th was in the committee of the whole almost all day. It became involved in a wrangle over the Coldwater public school scandal. In the course of debate, which became somewhat personal, it was suggested that no charges had been made against the management. Senators J. B. Babcock, Hubbell, and Devo immediately formulated and filed over their own signatures the following: "1. Certain teachers have been discharged without just cause. 2. Certain male employes have taken indecent liberties with certain female teachers. 3. That because certain other female employes told the truth they were discharged." This but added fuel to the flame. The continuance of the debate was marked with bitterness and personalities and the House resolution for an investigation was defeated by a vote of 18 to 13. The Senators filing charges protested against the action of the Senate, but it was of no avail, and the Senate squelched the demand for an investigation. The bill relative to specific taxes in the Upper Peninsula was taken up pending which the committee rose and the Senate adjoured.

In the Senate on the 5th, after a long and quite warm discussion the Oviatt capital punishment bill was defeated by a vote of 19 to 13. The friends of capital punishment will now favor the Senate bill providing death by electricity in case of murder. The Senate also rejected the House concurrent resolution for a committee to investigate the Coldwater State Public School on the ground that the Board of Control had looked into the charges and had instituted reforms, all persons implicated being no longer connected with the school. The Senate took an- victs. other turn at the copper and iron specific tax bill and agreed that the State club. shall receive 80 and the county 20 per cent. of the tax. It also passed a bill ppropriating \$20,000 to continue the ork of frescoing the Capitol. The bill contained a proviso that the contract shall not be let to an alien and that no alien shall be employed on the

But little important business was transacted by the Senate on the 6th, and it adjourned until the 9th. Gov. Luce appointed the following inspectors for the Michigan Military Academy: Gen. Luther S. Trowbridge, of Detroit, Hon Henry W. Seymour, of Sault Ste. Marie, Hon. Byron M. Cutcheon, of Manistee, A. J. Aldrich, of Coldwater, and Elliott G. Stevenson, of Port Huron.

The Senate, which was to have met two daily mails between Hart and at 2 p. m. on the 9th could not get a Shelby. quorum together. It was tried again at 7 p. m. but only six Senators were bresent

The Senate on the 10th, passed House bills authorizing the purchase of additional land for the Northern this expected, will begin Asylum for the Insane; appropriating \$130,000 for the expenses of the Soldiers' Home for 1887-'88, and amendauthorizing suits against navigation companies to be brought in the county where the plantiff resides or in any celebration July 4. county where boats of the company may regularly touch. Senator Hubbell stirred up the Coldwater public university museum. school scandal, and had read a letter from a discharged female employe arwas taken. The rest of session was spent in committee of the whole over Senator Westgate's bill for the organization of township school districts.

HOUSE. In the House on the 4th bills were passed making an appropriation of \$4,000 for support of an asylum for insane criminals at Iona. To provide for the appointment of a live stock commission: to make the office of Insurance Commissioner elective instead of appointive, and to enlarge his lowers and duties were taken from the table and killed. Bilis were passed to amend the laws relative to fore closare of chattel mortgages, to provide or laying out a State road in Arenie, losco and Ogemaw counties. The bill appropriating a large amount of tain lands in the townships of Albee and Spaulding in Saginaw county passed the committee of the whole and commenting on Mr. O'Brien's trip, says: was placed on order of third reading. The House spent a good part of the

ous liquors from \$500 to \$800, and for Advices from China say that the steamer | the manufacture of malt and brewed | was barely defeated. The House also passed four bills making appropriations of swamp lands for different purposes. These lands are to be taken from the swamp lands of the lower eninsula.

The House on the 6th had one of the warmest debates of the session over the Damon State constabulary bill for he purpose of enforcing the liquor laws. The more important provisions of the bill are as follows: It shall be the duty of the Governor to appoint prior to May 1, 1887, or as soon thereafter, State Marshal. The marshal shall hold his office for a term of two years was acquitted in the Circuit Court in from May 1 of the year in which he is Jackson recently. appointed and qualified, unless sooner The marshal shall have power to \$5 per acre and of stump lands at livide the State into as many districts from \$1 to \$2.50. is he may think necessary, and for each of the districts he shall oppoint one deputy, said deputy to have juris- June 15. Whenever complaint is made to the marshal or any deputy marshal hat any law referred to in the act is being violated, the marshal or deputy shall investigate, and on satisfactory proof of violation shall proceed against he person violating the law in accordince with the provisions relative to such cases. The marshal and his leputies shall have the same powers in duction of eight in the number of its executing the law as sheriffs in the saloons since the first of the month, little dog belonging to you disappeared rarious counties may have. The State | the \$300 tax having floored them. Marshal is to receive a salary of \$1,200 t year and actual necessary expenses. The deputies shall receive \$2 per day have shaken hands across the bloody ind their actual expenses while prosesuting their official duties, The bill athy.

finally passed by a vote 60 to 13. The afternoon session was occupied in the discussion of the Bates liquor bill.

The House, when called to order the afternoon of the 9th, had a bare quo- The bachelor's lot is lonely and sad, rum. The special order was omitted -the "Bates liquer bill"-and several bills were considered in committee of of the whole, and Representative Manley's 2-cent railroad fare bill was made the special order for the 13th. The Moon specific mining tax bill was discussed and forwarded to a third read-

In the House on the 10th, bills were passed as follows: To make appropriation for the State Reform School; to make employers liable for personal injuries to employes while in their service: an important feature of this bill is a provision that liability shall exist notwithstanding any contract between employer and employe waiving a right of action; relative to the Yes, the bachelor's lot is a desolate one, fraudulent removal or embezzlement of chattel mortgaged property; to appropriate \$3,300 for additional fire protection for the Soldiers' Home; to provide for the reissue of lost or destroyed certificates of stock of corporations or companies; bill authorizing the organization of the State Board of I know lots of girls who would do it-Agriculture into a forresty commission; to provide for the better protection of ballots used at elections, and the safe keeping thereof. The afternoon session of the House was devoted to the bill to amend and revise the liquor laws. The consideration of the bill was finished at 6 o'clock, only minor amendments have been made to it, but before the sitting concluded McCormick offered a substitute for the whole bill. The substitute provides for better sureties on liquor-dealers' bonds, seeks to simplify the provisions of the pending bill, and to follow as closely as possible the existing law.

Crisp, frosty breezes past me blow, And trip their way with cheery pace; The crescent moon is sinking low Her fading face.

Just where the skies and prairies meet, Commingling in a wall of haze, A flaming ocean seems to beat Its flood of blaze.

It seems to dash its ruddy surge Against some dark, low-lying bar; The smoky spray along its verge Is borne-afar.

Still wilder, grander grows the view, As other miles with glory beam; The heavens catch a mellowed hue From yonder gleam.

The golden grasses round me cower Before the fierce on-rushing waves So swift it comes, it seems no power Their ranks can save.

But quick the freshening wind has veered, And backward turns the curling line; Scon all the heavy clouds have cleared And left no sign.

And only fitful flashes leap;
'Tis ebbing now, that flery tide—
Though in new paths its billows sweep
O'er acres wide.

The splendor of the night is gone, That with its flush the landscape graced And in its stead I'll find at dawn A blackened waste.

THE YELLOWSTONE.

It can do no possible harm to tell the whole truth about the Yellowstone, and to acknowledge that while the great cence, the great spaces between these different wonders are immense distances of utterly uninteresting scenery, with a white blinding dust which is very nearly intolerable. It is true that the hot springs, and the geysers. and canon, and the lake, and the many-colored pools, are worth any amount of trouble in getting to them; but it is also true that they are worth taking any amount of trouble to lessen the trouble: and since it could all be removed by so last lingering look at Cleopatra's Bowl, simple a thing as a few rails and a locomotive, it is certainly a pity that a rills, not in the least like restless, turstate of things should be left existing bulent cascades, slip over the ring which prevents the very young, the very old, the very fastidious, or the very weak, from enjoying the real wonders of such a journey.

In the mean time, however, there is no railway, and our friends, as the next best thing would hire special teams and camp out. .

Joseph was pressed into service as It was very cool in the corrilors of the hotel, but a single step from the piazza proved their light satteen raveling dresses more comfortable than the blue flannel gowns still waiting for the reputed frost of the Yellowstone. Colored glasses were necessary to shield the eyes from the intense glare in the sunlight of the snowy terraces, dropping one after another for two miles from the dark pine woods above and around them, like a series of beautiful frozen cascades.

"I notice there is only one man who has the courage for figures," said the Man of Sense, referring to his guideoks as they crossed the white plateau the cone of an extinct geyser, towering fifty feet into the air. He seems to this thing.

'I can tellyou who he is,' said the knowman that tells you the Boiling River puts fifty thousand barrels of hot water into the Gardiner every twenty-four hours. I've often told him he'd oughter have let us know when he was going to measure it."

" 'Any estimate of the age of the the Devil's Thumb?"

smaller column, which was not only ex- got from the factory ammunition crepitude. Art was endeavoring to bringing water from the hot springs just above in wooden troughs, letting it trickle down the sides of the cone and to repair the ravages of time.

Joseph, "says the Orange Geyser builds obtained with a cast round ball propella foot in a century. And he says the ed by six grains of fine quick powder. hot springs will deposit a sixteenth of The old conical bullet made a ragged an inch in four days. All I know hole and was liable to turn and keyabout it is that I can put a beer bottle hole the target. The round ball cuts under some of the falling water, and as clean a hole as a sharp punch. To turn it round once or twice, and have it fix the proper charge for fifty yards Mr. beautifully coated over, with a white crust that won't crumble, in a day or

"Question; if you can coat a beer bottle in a day or two, how long will it take to build a geyser cone? Come, Mabel, you were last at your books.' "Fifty-four centuries," answered the

Maiden, promptly. "Correct. You may go up to the head;" and the Imperturable pointed to the upper terrace towering above them. It was not at all a steep climb, but they had to be wary about stepping in-

to the little rills of hot water trickling down from the upper springs.

"What is that dust?" exclaimed the hundred 38-caliber central fire cartridg-

Convert, suddenly. "I never saw dust es were sold at \$1 at retail. Now they rising from ice before.' "Well, marm," said the smiling Joseph, "in the first place, 'tain't dust; That is the reason why Conlin and other

and in the next place, tain't ice. The dust is steam, and the ice is formation.'

divest myself of the idea that all this turn out 500,000 small 22s and 1,500,white rock is arctic snow.'

perturbable; "this isn't exactly what I three other factories produce about 1, hould call arctic."

He had been, with the Maiden, the first to reach the top, and was gazing into the depths of the first of the Mammoth Hot Springs. The wind had blown toward him a sudden whiff of the hot sulphurous steam, and he had stepped back quickly, only to find that he had stumbled into one of the innocentlooking rills, that was decidedly warm

even through his boot. But what a magnificent sight it was! powder enough will be burned to make manuscript.

The whole snowy mass that had looked; the gallery trade worth something to cold and silent under the pale moon the cartridge trade. One man stands the night before was now glowing, ready to take 750,000 cartridges on a gleaming, pulsating with life under the contract if the combination will make morning sun. For perhaps a hundred its prices reasonable. acres the white surface was studded with brilliant pools, set like jewels, clear as diamonds, lovelier in color than opals, in rims of fretted frost delicate as lace and as firm as marble. Over these coralline edges trickles softly the gentle overflow of the lovely falling, falling, tremulakes. lously and without a sound, over the Sydney. "Oh," said the little man, fluted reed-like columns of the terraces below, only to leave them harder than

they were before "Isn't it incredible," said the Man of Sense, "that water so particularly clear should hold anything in solution so particularly hard?

"I don't know," murmured the Imperturbable dreamily. "It's like the careless remark of a woman who has packed her trunks for Europe that some ime she would like to go to the Yellowstone; it sounds remarkably simple, but you will find before long that there is an adamantine purpose at the bottom

They had reached by this time the curious little lake with hot springs bubbling up on one side of it, so that by choosing your spot you could have bath at any temperature you pleased "Them as likes their bath hot goes in on the left," explained the intelligent Joseph, "and them as likes it cold goes in on the right, and them as likes

t middlin' goes in in the middle." They looked patiently at all the curiosities which Joseph insisted upon Park contains certainly the seven won- their seeing in the woods, but were ders of the world in natural magnifi- glad to emerge at another part of the terraces, where the view seemed even finer than before. Nothing but the warm bright air about them served to remind them that it was not winter. which one traverses over roads covered | Even the exquisite coloring of the water, a lovely robbins's-egg blue, and the almost gorgeous coloring of the terraces where part of the deposit had formed in columns or streaks of the richest the Paint Pots, and the falls, and the orange and red, or of the daintiest pink or creamy yellow, failed to detract from the general effect of acres upon acres of snow and ice.

It seemed almost as if in this vast area every square inch was worth bending down to examine. They took a and then began the easy descent. How softly and slowly these noiseless little of their beautiful basins and down the fluted walls of the terraces, may be judged from the fact that Joseph told them they could only go down the way they were descending, becaus the wind that day was blowing the overflow toward the other side.

"Ah!" said the Maiden, with a happy sign; "it has been like going to Pompeii and Venice and the Alps and the Milan Cathedral and the arctic regions all in one morning."—ALICE WELLING-TON ROLLINS, in Harper's Magazine for May.

Pistol Shooting.

The increase of interest in revolver shooting has aroused the makers of pistols and cartridges to a realization of the fact that an improvement in their line of work is demanded, writes a New York correspondent of The St. Louis Republican. Good pistol-shots have demonstrated that the sights placthe base of the extinct springs, and ed upon pistols in the factory are crude used at the foot of Old Liberty Cap, devices, and that the regulation fixed know all about it, and declares that it to the weapons. The proportions of world. It was all intensely enjoyed; 'ook just fifty-four centuries to build up powder and lead in a revolver cartridge but better than all were the love phrases are not adjusted to give the best results. A pistol is a short-range weapon, and ing Joseph, with a laugh. "He's the it is carried usually for purposes of defense in close encounters. To load such a weapon with powder enough to send a bullet a quarter of a mile is absurd. A smaller charge is just as effective and insures greater accuracy of aim. The distances for target practice are from twelve to twenty yards, For lower terrace would be purely conjec- all practical purposes the shorter range tural," read the Man of Sense from is sufficient. Experiments by Prof mother guide-book. "Still, I suppose Conlin and the experts who use his there is no doubt about its being a gallery have shown that powder charges matter of centuries. In that case, how of five grains for the small bores and soon do they expect to finish reparing from six to eight grains for the large revolvers are heavy enough and give For they had walked over to the better results in accuracy than can be tinct, but crumbling with age and de- These men have been using their own ammunition for some time, and doing assist nature, and repair the waste by work with the revolver that makes the manufacturers open their eyes.

Mr. Thomas, of the Bridgeport ammunition factory, has made several evaporate, to leave its snowy deposit trips to New York to see the shooting He has satisfied himself that special Well, that feller that knows so ammunition must be made for accurate much about the figgers," explained revolver practice. The best results are Thomas is making tests at Bridgeport, following the suggestions of the shooters and working out some ideas of his

Making cartridges to suit the men who use revolvers is a new departure. Heretofore the pistol-makers have dictated the form of ammunition and have ordered as heavy charges for pocket weapons as for horse pistols. Whether the gallery men will buy the new factory cartridges for practice or load shells for themselves will depend upon the action of the cartridge-makers, who have combined to keep up the cost \$125, and there is no discount if

the purchasers takes half a million. gallerymen load their own shells. The extent to which cartrides are used "Of course," said the Convert. "I may be judged from the output of the ought to have known. But I can't factories. there you are! This is how to prepare the elixir of life, which Parcelsus did not-with all respect to Sir Thomas Browne-hold capable of rendering the physical body immortal, but only of prolonging life. Take half a pound of pure carbonate of potash and expose it in the air until dissolved. Filter the fluid and add as many leaves of the plant metissa as it will hold. Let it stand in a wellclosed glass and in a moderately warm place for twenty-four hours. Remove the leaves and throw them away; on the top of the fluid pour "absolute alcohol" to the height of one or two inches and let it remain until the alcohol becomes intensely green. Take away the and preserve it, and go on repeating the operation until all the corloring matter is absorbed by the alcohol from he alkaline fluid and evaporate it unjuvenate his constitution by purifying it so that it may be able to receive without any interruption the life-giving influence of the divine spirit."-All the Year Round.

Sweet Words. "My dearest of mothers." I heard the words repeated in soft tones by our next door neighbor at an inland farm house where we were sojourning, "My dearest of mothers." My friend was a widow, and her son, an affectionate, talented fellow, was engineering in Idaho. In one of his letters he had said, at the close: "And now, my dearest of mothers, good-bye." Did he lovable ways, and no one could help guess, I wonder, how the little petting phrase would please the heart that loved him so? Did he think that she would say it over softly to herself as she sat alone in her room?

The home days were over. The babies with their sweet ways, their joy giving and their trouble making, had grown to noisy boys, then to self-asserting men; they were out in the world making their way; brains busy, thoughts absorbed, hearts full; yet there was one who remembered the mother, still in middle life, loving and needing love the same as when her boys were her very own in the dear child's home. He wrote her long letters describing his adventurous. changeable life, the strange companions by whom he was surrounded; the wonamunition for revolvers is not adapted drous scenery of the wild western that showed the son's affectionate heart. I wonder if the "boys" know how how dear they a e to their mothers, and how little attentions, little gifts, tender words, and flying visits cheer and warm the hearts that have borne the test of years and sorrow.

Life is a little chilly to the mothers whose homes are things of the past. Even if they remain in the old home, the rooms seem very bare and silent after the children are gone. It is as if summer had flown, with its nest and bird songs, and autumn winds were blowing. Then the love of the sons and daughters is like sunshine or warm fires to the hearts that sadly miss them. Let us hope there are many sons who write "My dearest of mothers." - Cong. regationalist.

Hyacinths as Boutonnieres.

The best way to tell a man who goes into the highest circles of society, and who is one of fashion's votaries, is to see him buy a boutonniere." remarked a florist on Broadway to a reporter. The florist yanked together a half-dozen roses for a sallow-faced dude, used up a vard of small wire, received \$1.50 for the wire and roses, and continued his confidential chat about boutonnieres: "You see if those Jacqueminot roses

were cheap they would soon become

common and everybody would be

wearing them. The extra swells of society would immediately cease to buy Jacqueminot roses. That very thing has happened with the boutonniere flowers that were most fashionable a few months ago, the violets. They became cheap and everybody wore them, so that high-toned, heavy-purse dudes have quit wearing them. . Now they buy hyacinths, have them prettily wired together, and fasten them on through button-hole without any green leaves for a back ground. Hyacinths cost a little more than violets, and being white they do not catch the eye of the \$10-a-week young clerk. sides the hyacinth, sometimes a society swell will select a Jacqueminot rosebud and make it answer for a boutonniere, but he shuns the now common-place violet. It is quite the thing now to wear boutonnieres on light-colored spring overcoats. Watch the stream of people on Broadway and Fifth avenue in the afternoon when the swells are out in numbers and see the style of the spring overcoat boutonnieres: they are catching and artistic. Many of these wear or receptions and they have hyacinths pinned to their dress coats."—New York Mail and Express.

the Capitol at Washington, is finished at Rome. It is seven feet high and represents its subject standing, his right hand nervously clutching his coat-lapel to this tirade, for he was far too surdangered every time a dog has a fit, and his left hand grasping a roll of

THE YOUNG FOLKS.

The Land of Little People.

Far away, and yet so near us, lies a land where all have been, Played beside its sparkling waters, danced along its meadows green.
Where the busy world we dwell in and its

noises only seem Like the echo of a tempest or the shadow

of a dream; and it grows not old forever, sweet and young it is to-day— Tis the Land of Little People, where the happy children play.

are so wonderful and grand. Things that wiser folks and older can not know nor understand: In the woods they meet the fairies, find

And the things they know and see there,

the giants in their caves, See the palaces of cloudland and the mermen in the waves, Know what all the birdies sing of, hear

the secrets of the flow'rs-For the Land of Little People is another world than ours.

Once 'twas ours: 'tis ours no longer, for when nursery time is o'er Through the Land of Little People we may wander nevermore.

But we hear their merry voices and we see them at their play, And our own dark world grows brighter and we seem as young as they, Roaming over shore and meadow, talking to the birds and flow'rs-

For the Land of Little People is a fairer world than ours. -[Auckland News.

The White House Children.

Mr. Crooke in his admirable article about the children of the White House gives the following in regard to the Hayes, Garfield and Arthur children: "Of the Hayes children, Burchard was the oldest. He did not live at the White House and only visited there occasionally, so I didn't see very much of him. Webb Hayes came next, and then Rutherford B. Hayes. They were all three good, square, every-day boys, til it becomes a sirup, and that is yonr with no nonsense about them, and apelixir of life, by which "man may reparently not a bit stuck up because parently not a bit stuck up because their father was President. Rutherford was away at school a good deal of the time while his father occupied the White House.

"I saw a good deal of Webb Hayes, who attended to much of his father's private business, and I must say he was a good, square, honest fellow, with many admirable qualities. Fanny and Scott Hayes were the little ones of the family. Fanny was a sweet little school girl, with many of her mother's attractive qualities. Scott was a harumscarum little fellow, brimming over with animal spirits. His heart was in the right place, and I have no doubt he will make a fine man. Although he was a little rascal, he had a good many admiring his manliness.

"What has become of them all? Burchard Hayes is practicing law in Toledo. Webb is, I think, engaged in the manufacturing business in Columbus. Rutherford B. Hayes is in the banking business at Fremont. Fanny is going to school in Boston, and Scott goes to school near Frement."

"The Garfield boys were holy terrors,' to speak slangily, but everybody liked them. The children were Harry, Jim, Nellie, Abraham and Irving. Harry and Jim were near of an age, and they owned the place. The President was just like a boy himself when he laid aside business and joined in their games with great pleasure. The boys were up to all kinds of tricks and pranks, and many were the practical okes played on those about the house.

"The room in the northeastern corner of the house, which is now the telegraph room, was then used as a school room. Dr. Hawkes was the tutor. The son of Colonel Rockwell, who was Commissioner of Public Buildings and Grounds, went to school with the Garfield children. The older boys went to college at Dartmouth, and are now with their mother, I think, in Cleveland, as are the younger children.

"President Arthur had but two children-Alan and Nellie. Nellie was a favorite name for the White House children. There were Nellie Grant, Nellie Garfield and Nellie Arthur. The latter was a pleasant taced little school girl while she lived at the White House. Alan Arthur was a student at Princeton, but came to Washington frequently. He was rather reserved in manner, but was quite a good fellow when you once knew him well. He had a good many dudish propensities

and was inclined to be somewhat fast. "He has settled down, however, into a steady going young man. I heard him say before his father died: 'I am done now; I have had a good time, had all the fun that was going, but now I mean to put my nose to the grindstone and stick to business. I have sowed my wild oats.' I guess he told the truth, for as near as I can learn he is doing very well in New York, and I have no doubt he will make a sterling man of business. That ends the list, as far as my memory goes."

Cadet Hospitality at West Point.

When a number of successful applicants had returned from physical examination at the hospital, they were put in charge of an orderly, who conlucted them to Cadet Barracks.

The orderly took the party to the and told them to wait there quietly, and to enter the "office" one at a time, as their turn came, and report. Then immediately began a course of the like squash pie."-Boston Budget. treatment known as "hazing". When Fred Arden opened the door and walked in, he immediately found himself the center of a howling mob of cadets, who "would like to know, sir, what you mean by walking into this office without knocking, sir? Step out there and try it over again!"

came. But once again had he offended saw off two cuts after 4 o'clock. in the matter of etiquette, as he soon discovered from the cries of "Take violets, but see them later at the opera brought up, I'd like to know?" waiting their turn, looked on in unhappy anticipation.

Fred's third attempt at entrance was more satisfactory, and a cadetcorporal approached him in a very business-like manner and accosted him with:

"Well, what are you here for? What do you want?"

Fred replied that he came in to re-"Well, then, why don't you 'report," and climb out again? What's your

"Fred Arden." "What!"

"Fred Arden," in a louder tone. "Mister Arden, sir," shouted the cadet-corporal.

"Yes, sir," Fred admitted; "that's

"Then suppose you report properly; I have no time to waste. What's your name?"

"Mister Arden." "Mister Arden, sir!" roared the now apparently exasperated fledgeling. "Mister Arden, sir!" repeated Freq

with emphasis. "Ah! now, where are you from?" demanded his inquisitor.

"From Maine-sir!" replied Fred. rendered wise by experience.

"There, now, you have made some progress," commented the tormentor. You have learned to address old cadets as 'sir'. Never forget this. Also, understand that you are now under military discipline, and that a soldier's first duty is strict obedience to orders. Here Jake." he continued. turning to a cadet near him; "take it upstairs and cage it."

With a gruff "Come along, sir,"
"Jake" led the way up the iron staircase to a room on the third floor, and with a gruffer "You stay in there until further orders," left Fred to his own devices .- St. Nicholas.

Name-Carving at Harrow School.

The old school-house at Harrow is still standing. There is a room downstairs where all the boys in the early days had their classes. But now it is only used two or three times a week, when masters and scholars assemble in it for prayers. It is a long, narrow room, with high, old-fashioned windows. The walls are wainscoted, and all over the wainscoting and on the benches and desks, on the masters' tables, and even on the head-master's chair, school-boys for the last three hundred years have carved their names. Some of these names are large and sprawly, others small and neat; and they are so close together that there is no space left for any new ones to be added. On one side, in very large letters. Byron's name is cut in two different places, and near it is that of Peel, the great English statesman. The boys were really forbidden to do this; and every name, you may be sure, represents a good punishment. But the masters are now glad that the boys were disobedient; for many became famous in after life, and their school boy carvings are pointed out with pride. Harrovians, as Harrow boys are called, now have their names carved for them on new panels fastened to the wall for the purpose, and they think it quite an honor.—St. Nicholas.

On Girls-By a Boy.

Music of the Wires.

Amusement was afforded a party of young people, visitors at the house of a wealthy gentleman on the heights of Brooklyn not long ago, when the weather was warm, permitting open windows, by the simple construction of three or four Æolian harps. There was the least stir of the air, and the music produced was soft and sweet and very varied in its tones. The strings were of catgut and silver wire, drawn to full tension, and were attached to the drums of Japanese tomtoms which, in turn, were screwed against the window frames.-New York Times.

She Was Right.

A teacher was endeavoring to find in mental arithmetic, and took the following method of ascertaining what she desired to know: "Now, children," she said, "suppose I have two squash pies and divide one of them into ten pieces and the other into 100 pieces, which would you rather have, a piece of the pie that was divided into ten pieces or of that cut into 100 pieces?" hall of the eighth division of barracks, There was an absolute hush for a moment and then a little girl answered timidly: "One of the 100 pieces!" "Why?" "Well, please, ma'am, I don t

A Handy Schoolmarm.

An Alabama committeman writes to a Normal school that the town is very well satisfied with its teacher. He says: "She tries to make everything just as pleasant as she can. She Fred precipitately backed out, and don't mind work. She takes the axe closing the door, knocked. BEYOND THE HILLS.

What's beyond the distant hill tops, Stretching westward, far away-Sathed in golden mists at sunset, Purple haze throughout the day?

What's beyond those mystic summits, And that faint horizon rim! Is there some "Fair Land of Promiso" Just beyond the hill-tops dim!

O, my Guardian Angel tell me, If I climb the distant hills, Shall I find what most I long for, What my wildest dream fulfills?

In the valley, all about me,
Fields are full of ripening grain;
But I long to mount the hill-tops— Unto greater hights attain.

O, my faithful Guardian Angel, Why such grave reproachful eyes!
I must climb those purple hill-tops;
See the star of Fame arise.

I must go, and win, and conquer, I must wear a laurel crown—And the world shall bow before me, Ar. shall give me great renown But my faithful Guardian Angel

Whispers softly: "Turn thine eyes From those distant, purple hill-tops, And those glowing, western skies "Look around thee, in the valley,
At the work there is to do—
For the fields are white with harvest

And the laborers are few. "You will faint upon the mountains And your bread will turn to stone. Lo. a b ackened cloud will lower,

Where the star of Fame once shone. "Dare it not—the smile illusive, Is too oft a hidden frown. You will shrink and pale and shudder

At the sharp thorns in your crown. "Do not slight the wayside flowers And the blessings near at hand, Patient working, patient waiting Leads into the 'Promised Land."

-ISABEL HOTCHKISS. A HARPOONER'S REVENCE.

Becalmed off the coast of Peru lay

Nearly three years had passed since she sailed from Nantucket and so suc cessful had she been that now only one more good whale was needed to give her a full cargo of oil, when, under all sail, she would be headed course, on her into his mighty form. a homeward-bound ship.

The captain a fine looking man of thirty, was pacing the quarter-deck, with a happy, thoughtful expression upon his sun-embrowned visage. He was thinking of his wife and two children, far away in the Nantucket cottage, where he hoped to be in a few months from the present time.

"There they are," he said to his first mate, half an hour later, taking from his pocket a small photograph, containing the likeness of his two little onesa boy and a girl. "They will have changed somewhat in over three years. It will be a happy day for me when I see them again.

"You will never see them again, if I can help it," muttered to himself the tall, dark harpooner of the captain's boat, as, while arranging his line in that craft, he overheard the skipper's remark.

The name of this harpooner was John Rockel. He was a half-breed Gayhead Indian—a skillful thrower of the barbed iron, and a good sailor, but possessed aversion to Kanakas, and recently, he was about to strike one of these islandline in the starboard boat, when the captain interfered. Rockel, in his rage, pushed the captain, but the latter, seizing him by the collar, hurled him down on his back; and then saying he supposed the harpooner had forgotten himself only for a moment, and had never before opposed him, he was will-

ing this time to overlook the offence. Very well" thought Rockel, "but John will never forget yours! That hand, lifted to help his enemy, the Kanaka, still burns at his throat! John must have his revenge."

So, now, there in the starboard boat, he continued to mutter about vengeance. Suddenly, far aloft from the three

lookouts, came the well-known cry of "There blows!" About a mile ahead of the ship, the thin spouts of a school of sperm whales rose, like jets of silver; in the sunlight.

The men sprang up; there was a

banging of a handspike against the forecastle scuttle. "All hands ahoy! Stand by the boats!" came a stentorian voice that

made every man below leap from his bunk. In a few seconds all hands were on

deck. "All ready there?" inquired Captain Hussey, turning to the boat-steerers, out the proficiency of her little friends who had sprung into their boats to prepare their craft.

> "Ay, ay, sir," was the answer. "Lower away, then. Lively, but no noise."

> The boats were soon in the water, with their crews lightly scrambling into them. Four had been lowered, and as soon as the captain passed the word to "Give way!" there was a race for he whales.

> The skipper's boat took the lead. It contained a picked crew, amongst whom Loko, amidship, and Rockel at the bow, were remarkable oarsman. In a short time it was within ten fathoms of a large bull whale, whose barnnacled hump, as he lay nearly motionless glistened in the sunlight.

> and Rockel, iron in hand, rose like a fiash to his feet. As the usual words. "Give it to him!" passed the captain's lips, the Indian sent his barbed weapon deep into the

"Stand up!" ordered the captain.

whale's hump. The monster gave a wild sheer-for an instant his dark, agile form seeming to bend almost double-whisked about scattering a cloud of spray around the boat. Rockel hurled the second iron; then, with one mad, sidelong sweep of his flukes which just missed the bow, the whale sounded (went down).

Away went the boat, the line spinning round the loggerhead, and the tub oars men pouring water upon it to keep it from burning.

Far astern, the other boats looked smaller every moment, until at length they seemed little more than specks on

Fo: ome time it was feared that the rich gifts instead.

whale would take all the captain's line. but at last the rope began to slacken, showing that he was about to come

"Haul line!" was now the order. And the skipper, who had ere this changed places with Rockel—the former going to the bow and the other to the steering-oar aft-selected a good lance, and stood ready. The men conlinued hauling on the line, until, suddenly, the water parted with a roar, about twenty fathoms ahead, and up came the whale, his huge form looming from the surface as he rolled about and whirled his flukes.

"Your oars, men!" shouted the captain.

And in an instant the oars splashed in the water.

The light craft rapidly drew near the monster. Meanwhile the other boats, fast approaching, now were not a mile off. Soon within ten fathoms of the

whale, Captain Hussey sent his long lance quivering into its body, when, with a sort of a gurgling roar, the old bull, opening wide its huge jaws, threateningly displayed the white scroll of his teeth, while his flukes pounded the sea with thunderous strokes. Again Hussey hurled a lance into the body of the coveted prize, and then

it was that, full of vengeful ire, the monster, whirling round, came sraight for the boat, with yawning jaws, his broad flukes churning and beating a white path of foam in his wake, while the spray, dyed with his blood, flew in crimson drifts about him.

"Stern! Stern!" ordered Hussey; and while he spoke he sent another lance into the huge body.

"Now John's time has come!" thought Rockel, clinching his teeth. "The whale will bite the captain in two, or knock him dead with his flukes, the old whaleship, Coral, Captain Hus- if so I can manage it. Don't care if I sey, with her three lookouts at the do have the boat stoven; other boats mastheads, keeping a sharp watch for not far off. They will come and pick

the rest of us up. The men backed water, but so rapid was the approach of the whale, and so cunningly did John, with his steeringoar, retard the motion of the craft, that the bull gained fast, coming straight forward in spite of the captain's lance, which was plunged again and again

"Now!" muttered John, as all at once the whale gave a forward rush-He worked his steering-oar so that the boat's backing was suddenly nearly checked, when with tremendous force. the bristling jaw struck the bow, crushing it like an egg-shell. 'Jump for your lives!" shouted

Hussey, just escaping the jaw by throw ing himself over, sideways, into the sea. The next moment all the men were in the water; at the same time, diving edgeways under the boat, the whale, whirling his enormous flukes upward, sent the light cedar planks flying in

many splinters.

The crew now endeavored to strike out from the vicinity of their powerful foe, who was still beating the sea with his flukes, as if feeling for his enemies, while the line, fast to the irons in his body, flew wildly about the heads of the swimmers.

With fierce disappointment, Rockel, the Indian harpooner, who had thought to insure the captain's destruction, now saw the latter buffeting the waves a few feet from him. Suddenly there was a hoarse cry from

Hussey, as a bight of the line caught of a cruel, revengeful disposition. Not tightly about his breast, under the "Quick, Rockel! cut the line, or I am

They cry if they see a cow in a ers—a youth named Loko, who had down in a few seconds, and drag me "The whale will go The eyes of the young Indian flashed, exultingly. He swam on, heedless. of

the captain's cries. After all he would have his revenge. The skipper having lost his own knife, which had dropped out of his pocket when he fell, seemed doomed to be soon dragged by the whale into the dark depths of the ocean. All at once Rockel turned and struck off in another direction, for the leviathan had swung round, with his flukes beatng the sea, close to him. The next moment the Indian saw those monstrous flukes raised above his head. He quickly dove, but while his back was yet out of water, the huge appendages came down upon it, crushing the life

out of him in an instant. Meanwhile Hussey was still vainly struggling to free himself from the line which held him firmly in its tight coil. The whale, a few yards from him, was yet beating the sea with his flukes, but it seemed evident that he would soon quick tramping of feet: and then the go down, dragging the unfortunate man to his fate.

"Good-by, wife and children, goodby!" he cried, sadly. "I shall never see you again!"

But just then a lithe, dark form ame swimming near those flying flukes, and narrowly escaping their blows, gained the captain's side.

It was the young Kanaka, Loko, who, the moment he had detected the skippers situation, had used every effort to reach and save him. From his teeth, in which he held it, he now pulled his sheath-knife, and with two quick blows cut the line loose from the imperilled man.

Nor was this done a moment too soon; for scarce was the line severed when, with one farewell upward fling of his flukes, the whale dove down to-

ward the fathomless depths. The three mates' boats which during this time had been steadily approaching, where now not many fathoms off, and the Kanaka—as are all the people of his race-being "at home" n the water, assisted his nearly exhausted companion to keep afloat until the larboard boat arrived and picked them up, together with the rest of the

Before night, the whale having come up, much weakened by his many wounds, was attacked by the three boats and killed. He yielded more than oil enough to complete the carge of the Coral, which, when it was all stowed was put under full sail, homeward bound, bearing the Nantucast men, with merry hearts, toward their native shores, and leaving far behind her the broken, mangled form of John Rockel, the wily pletter, who in planning the captain's death, had but compassed his own destruction.

Owing to ill-health the Empress of Austria this year was obliged to forego the customary washing of the feet of twelve old women on Maunday Thursday at the Hofburg. She made then

The Opsilantian.

The Orangemen of Toronto last night covered themselves with everlasting disgrace by their riotous assault upon Mr. O'Brien, the Irish editor, and his friends; and the disgrace attaches even more deeply to the government whose police looked idly on while a howling mob of a thousand brutes pelted with bricks three or four unarmed and defenseless men. Let no English-speaking citizen of Canada hereafter sneer at the French element of Montreal for their senseless turbulence.

The constitutional prohibition convention held in Detroit Tuesday and Wednesday of this week, a non-partisan gathering composed of members of all parties, effected a permanent state organization, under the name of 'The Citizens' Union of Michigan, devoted to the securing of prohibition: C. A. Newcomb was chosen president, Hon. E. B Fairfield corresponding secretary and state organizer, Frank B. Preston treas urer, with an executive committee of seven headed by Col. Sylvester Larned. who are to appoint a vice president in each county; and county and local organizations are provided for.

The having a path from several hundred to a thousand miles wide, with a dead calm at its center and the air rushing toward the center from all directions. It is the typhoon of the East Indies, and in our hemisphere it originates in the West Indies and passes through a northward curve over the ocean or along the Atlantic coast. The tornado, on the contrary, is always a land storm, and peculiar to the United States. Its path is narrow, and its geographical distribution is governed by the physical character of the country. A chart illustrating the location of recorded tornadoes during the last 125 years shows its favorite haunt to be the northwest portion of Missouri and the adjacent regions of Kansas and Iowa. ganized composed of members of Su-A dense cluster appears in the south- perior Grange. west part of Michigan; the dots are thickly distributed across northern Alabama and Georgia, considerably in field to work. Mississippi and the Carolinas, Ohio and the entire Northwest, and the week. and the entire Northwest, and the Middle and New England States. The only state east of the Rocky Mountains Will Sherman of Eaton's Mills has compalied and will she Earon and the McCorkle fire insurance agents carry a full line of the best companies. Insure your dwellings in only state east of the Rocky Mountains

Lieut. Finley's book is devoted chiefly to the tornado, and by its use people exposed to the visits of that monster may intelligently govern themselves and largely escape its fury.

more free advertising during the past year than any town or city in the state. The meeting of the Press Association, held there in June last; secured the city columns of commendation in a majority of the weekly papers of Michigan. The Foster-State Public School affair has attracted public attention to the town during the past two months; was a grand success and netted the so-the charge of conspiracy to murder, ciety the nice little sum of \$33. made against C. H. Thomas, an old resident of the city, has caused it to secure a place in the associated press reports; the sudden death of Geo. W. Weller, a wealthy and prominent but dissipated citizen, increases the notoriety of the place, and its daily representation in the list of pensioners keeps it before the people. One year ago Coldwater was looked upon as a model of propriety and good behavior, but recently it has been enjoying, or suffering, from a boom in sensational notoriety that would satisfy even the most ambitious actor or lecturer.

The Saline Observer suggests that the editorial fraternity of Washtenaw county would be benefitted by an association through which they could become better acquainted, and enjoy social intercourse, etc. A better suggestion might be that the editors of the as superintendent. county form themselves into a Sunday School class and secure the services of the Rev. Mr. Holmes, late editor of the Chelsea Herald, as teacher. Better acquaintance doesn't always mean stronger affection, nor is social intercourse at all times mutually agreeable, but we would be willing to risk a little of each would be willing to risk a little of each would be willing to risk a little of each with the Washtenaw editors, under suitable surveillance such as the guard-Joel Randall visited his family, Sunianship of the editor of the Chelsea Herald would insure.

We were fooled again last week. We say again, in order that it be under- of this place have formed a Ladies' Aid We were fooled again last week. We stood that the instance referred to was not the first time we have been made the innocent victim of base deception. the innocent victim of base deception.

An imposing personage with long red fernal' improvements about his resiwhiskers and a short red nose called on | dence week, and submitted a bottle of superior ink of his own manufacture to our inspection. He had been a school teacher, he informed us, in soft winning tones such as only school teachers can assume, had seen better days and nights, and once wore a plug hat; he Frank Bush, and other relatives during was sorry, very sorry, to impose upon our time and patience, but hoped we Miss Alice Quackenbush who is

-a hope, by the way, which did not find a responsive beat in our bosom. His ink, he said, was an article that he he did. We threw the inferior ink out of all the bottles in the office, bought a few days visiting their brother Mr. pint of the superior article from the Geo. McCormick. polite stranger, and looked after his tall form as he passed out the door with a sigh of regret that all men were not so gentle and thoughtful as he. We sighed some more regrets later in iting old friends and neighbors in not so gentle and thoughtful as he. the day. The "superior ink" was a combination of lamp black and water.
